Product Description:

The OX-ON Chemical Comfort 6300 is a black chemical glove for working in the cleaning or chemical industries, in a laboratory or the food industry.

The glove is 30 cm long, has a thickness of 0.8 mm and protects both hand and forearm. The chemical glove is made of heavy latex with a diamond pattern in the palm for excellent and safe grip. A rolled cuff increases the stability of the glove and makes it easy to put on quickly.

The Chemical Comfort 6300 provides good comfort thanks to the flocklining, which also makes it comfortable to wear the glove for longer periods of time.

The latex glove is food approved, but not recommended for work with oil-based chemicals.

NB: Before working with chemicals, oils, solvents, etc., we recommend reading item 8 of the safety data sheet for the corresponding product to ensure the correct choice of protective equipment.
