nylon 13%
fiberglass 9%
polyester 7%
spandex / lycra 2%

Product Description:

The OX-ON Cut Comfort 9300 is a durable and highly cut-resistant (Cut Level D) glove for anyone at risk of cutting injuries, such as carpenters, mechanics, glaziers, blacksmiths, or anyone working in industry, waste disposal or assembly.

The work glove is a finger-dipped knitted glove made of polyester and nylon, which makes it extremely durable. The elastane in the glove also gives good flexibility and ideal fit. The palm and fingers are coated with nitrile, which provides a rough surface for a precise and secure grip.

The Cut Comfort 9300 reduces the risk of cutting injuries because it contains cut-resistant fibers. It thereby increases safety if working with sharp objects. This is a significantly more durable work glove than the traditional flex gloves on the market.
