PU 34%
nylon 13%
fiberglass 9%
polyester 5%
spandex / lycra 2%

Product Description:

The OX-ON Cut Basic 9000 is an affordable and cut-resistant (Cut Level C) glove for e.g. carpenters, mechanics, glaziers, or blacksmiths or anyone working in industry, waste disposal, and assembly.

The cut glove is made of polyester and nylon, which is durable, and elastane, which makes it flexible to wear. The Cut Basic 9000 also has a PU coating, providing excellent grip.

The work glove has cut-resistant fibers and is therefore particularly suitable for working with sharp objects such as glass, metal plates, and cutting tools, when protection is needed for hands and fingers. This style provides a more durable work glove than the traditional flex gloves on the market.
