black

Materials:

HPPE 35%
nitrile 34%
nylon 19%
fiberglass 8%
spandex / lycra 4%

Product Description:

The OX-ON Cut Supreme 9601 is a 100% waterproof and highly cut-resistant (Cut Level E) glove for anyone wanting the best equipment and working as mechanics, glaziers, or blacksmiths (for example), or in industry, waste disposal or assembly. An additional feature is that this glove is double-dipped. The inner layer makes it water-, oil-, and liquid-proof, making it suitable for working in wet environments. The outer layer is made of sandy nitrile, which gives a precise and secure grip. The Cut Supreme 9601 is made of nylon and polyester, which makes it extremely durable. The glove also has a particularly high elastane content for extra flexibility compared to similar cut-resistant work gloves on the market. The glove stands out from other Cut gloves thanks to High Performance PolyEthylene (HPPE), which provides an extraordinary cut-resistant effect. The Cut Supreme 9601 ensures the best in terms of safety and comfort.
