Product Description:

The OX-ON Banded Earcap Supreme is a stylish, ergonomically designed banded hearing protector for those who are periodically exposed to noise while working professionally or at home. This banded hearing protector is quick to put on and take off, and the replaceable and reusable TPR plugs provide excellent comfort and seal tightly at the opening of the ear canal. The band can be placed under the chin or behind the neck, where it does not cause inconvenience, making it easy and flexible to wear while moving around. This hearing protector offers extraordinarily high attenuation compared to other banded models on the market. OX-ON Banded Earcap Supreme has an attenuation value (SNR value) of 32 dB.

Placement under the chin: High frequency: 33 dB, Medium frequency: 29 dB, Low frequency: 28 dB.

Placement over the head: High frequency: 32 dB, Medium frequency: 28 dB, Low frequency: 26 dB.

The OX-ON Banded Earcap Supreme makes it easy and comfortable to protect your hearing when exposed to noise, and replacement plugs for this model can be purchased easily (item no. 23290).

Note: Refer to the guide for selecting hearing protection with the correct attenuation value.
