Product Description:

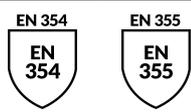

The OX-ON Magnum Twin Supreme 2m is a 2-meter climbing line tested for users between 50 and 150 kg, and is suitable for tasks such as scaffold and mast work. The rope is made from strong, edge-tested 12 mm kernmantle rope with an energy absorber. The OX-ON Magnum Twin Supreme 2m has a working length of up to 2 meters and is equipped with large, user-friendly aluminum scaffold hooks with a 60 mm opening, as well as an auto-lock aluminum hook with a 25 mm opening for attachment to the harness, ensuring quick and easy handling. The anchorage point should, if possible, be positioned above head height to minimize free fall distance. Please note that the fall clearance must always be calculated before starting any work with fall protection. For more detailed information on required fall clearance, refer to the enclosed user manual or contact OX-ON.
