Product Description:

OX-ON Kneepads w/Plastic Cap Comfort are the kneepads for you, who need the right protection and flexibility when you work on your knees.

The cap consists of TPR (thermoplastic rubber), which is an extremely hard-wearing and environmentally friendly lightweight material that makes these kneepads extra light and comfortable to wear. With OX-ON Kneepads w/Plastic Cap Comfort you get a special combination of a hard outer cap that provides the optimal protection, for example on very uneven surfaces and a lightness and flexibility, which allows for good mobility while you work on your knees.

The kneepads are made in a nice, black design and are easily fastened with two bands with velcro-closure that contribute to a unique fit.
