Product Description:

OX-ON Coverall Chem Comfort is an extremely durable and well-fitting liquid-tight yellow protective coverall with hood. The coverall is made of non-woven polypropylene, and it is coated with a polyethylene film, which makes it useful for the vast majority of work tasks with for example liquids, chemicals and pharmaceuticals. This is an extremely comfortable and exclusive protective coverall for you, who want the top-of-line quality equipment. The coverall is made with elastic in hood and waist and at wrists and ankles for tight and optimum fit and user comfort. At the same time, it is provided with a 2-way zipper and adhesive flap as well as thumb straps that hold the sleeve in place. The protective coverall is provided with sealed seams.

OX-ON Coverall Chem Comfort is type 3, 4, 5 and 6-approved, which means: Type 3: Liquid Jet Protection. The coverall, including the seams, protects against strong and directional nozzles with liquid chemicals. Type 4: Liquid Spray Protection. The coverall, including the seams, protects against liquid, where one is extra exposed. Type 5: Hazardous Particulate Protection. The coverall protects the entire body against airborne solid particles. Type 6: Liquid Splash Protection. To a limited extent the coverall protects against a light spray of liquid chemicals.
