Product Description:

OX-ON Eyewear Space Comfort with yellow lenses are durable and extremely flexible safety approved glasses for you, who need optimal adjustment.

The yellow lenses are manufactured in extremely impact-resistant and scratch-resistant polycarbonate, and due to the colour they are ideal for working in low light conditions such as cloudy weather, dawn and dusk. At the same time, the yellow colour has contrast-enhancing properties.

These sporty and tight-fitting lightweight glasses are provided with length-adjustable temples and swivel joint. The swivel joint gives you the possibility to change the angle of the lenses so that they give optimal protection for your eyes against particles and fragments. The temples of the glasses can easily and quickly be adjusted so that the glasses fit perfectly to your face.

The soft ends of the temples ensure you perfectly good comfort when you need to wear the glasses for a long time, and as the lenses have an optical class 1 certification, the safety glasses are applicable for permanent use. The safety glasses are designed so that you have a field of vision of 180 degrees, and the lenses provide 99.9% UV protection.
