green, white

Product Description:

OX-ON Fall Arrester Edge Ultra Supreme 10 m edge-tested rope with slide lock in stainless steel and fall arrest package. Rope slide lock with auto-lock carabiner is attached to a durable 12 mm kernmantle rope. In addition to the fact that the kernmantle rope is extremely strong, it does not twist like regular, traditional rope. Tested for users weighing 50-150 kg. The rope is for vertical use with an auto-lock carabiner for anchoring. The rope slider follows the person's movements and immediately brakes a fall. The lower part of the rope must be attached or supplied with a counterweight. The rope and slide lock are fastened together and cannot be used separately.
