

Art. no.: 355.82

OX-ON Fall Arrester Basic 10m

Features:

- Kernmantle rope
- Fall arrester
- Slide lock of galvanized steel
- Auto-lock carabiners.

Colours:

white

Product Description:

OX-ON Fall Arrester Basic 10 m consists of a rope with slide lock of galvanized steel and fall-arrester package that triggers a maximum energy absorber of 1 meter. It is particularly suitable when you need to perform, for example, roofing work with a ground clearance of min. 4 meters.

The rope is for vertical use and it is equipped with an auto-lock carabiner for anchoring. The rope slider follows your movements and it will instantly brake your fall if you experience an accident.

The rope slide lock with auto-lock carabiner is attached to an abrasion-resistant 12 mm kernmantle rope. Kernmantle has good properties and in addition to being extremely strong, it does not twist like ordinary rope.

You should attach the lower part of the rope - or equip it with a counterweight.

The rope and slide lock are mounted together and cannot be used separately.
