polyester 25%
spandex / lycra 3%

Total water consumption:

0.152 m3 world eq.

Product Description:

OX-ON Recycle Junior 16000 is an extremely comfortable, supple and soft glove for children, where 50% of the glove's knit fabric is made from recycled polyester derived from plastic bottles. The glove is also Oeko-Tex certified, which is your guarantee that it does not contain hazardous chemicals or dyes. The entire palm and fingers come with a dipped latex foam coating, which provides unique finger touch sensitivity and overall good freedom of movement for the hands. The palm and wrist are made of polyester and elastane, which ensures a good fit. Overall, the gloves consist of 28% recycled material. OX-ON Recycle Junior is perfect for children who are outside in damp weather or who need a pair of gloves that retain finger sensitivity. This means that the child can keep the gloves on even when they want to examine things more closely. The model is available in 'pink' and 'blue'.
