Carbon 6%  
spandex / lycra 3%

### Product Description:

OX-ON Flexible Advanced 1907 is the thinnest in this class of glove, but still of the highest quality. It is also ESD approved and has an integrated touchscreen function. The glove is extremely durable and fits as if it were made for you. The fit is exquisite and extremely comfortable to wear day after day—and specially designed for those of you who work with equipment where antistatic protective equipment (ESD) is required. The glove is knitted nylon and elastane, which gives you a unique breathability, while the flexibility and comfort are unsurpassed. The palm and fingers are coated with a thin nitrile foam of special quality, which allows you to maintain sublime fingertip touch sensitivity and a secure and precise grip.

The Advanced 1907 glove is OekoTex certified. This is your guarantee that the glove does not contain chemicals or dyes that are hazardous to health or the environment. The glove has also been treated with the Sanitized process, so it feels fresher for longer and protects you from bacteria and perspiration odors. The durability is extended by the fact that the glove can be washed up to twice at 40 degrees and tumble dried at low temperatures without losing its unique properties.

### Sizes:
