consumption:
0.573 m3 world eq.

Product Description:

OX-ON Cut Supreme 9603 is an extremely cut-resistant (Cut Level D) winter-lined glove. Designed for anyone working in cold conditions where there is a risk of cutting injuries – for example as a glazier, metal worker, carpenter, contractor or in refuse collection and scaffolding. The glove is double-dipped, where the inner layer ensures dry palms and the outer layer provides extra durability and excellent grip. The outer coating provides added wear-resistance and excellent grip. The latex coating helps to make the Supreme 9603 an extremely soft, supple and comfortable glove, giving you great finger touch sensitivity and a superb fit. The knit is a blend of High Performance PolyEthylene (HPPE), acrylic, polyester, nylon and elastane to enhance glove softness and suppleness. Thanks to these features, Cut Supreme 9603 is the best in terms of safety and comfort.
