OX-ON Protect Coverall Comfort

Features:

- Extremely durable
- Liquid-proof
- Taped seams
- Antistatic
- Breathable

Colours:

white

Product Description:

OX-ON Protect Coverall Comfort is an extremely durable and waterproof protective coverall with taped seams if you work, for example, asbestos, handling chemicals, spray pesticides, spray paint or spray from cleaning agents. You get extra protection and comfort with this anti-static, nonwoven polypropylene coverall. The surface is treated with microporous film that protects you from airborne particles such as asbestos, viruses, insulation and liquid chemicals - even in the seams where you are exposed. OX-ON Protect Coverall Comfort is type 4, 5 and 6 certified, which means: Type 4: Liquid-proof. The coverall protects against liquid chemicals, even in the seams, where you are especially exposed. Type 5: Dust particles. The coverall protects the entire body from airborne, solid particles. Type 6: Liquid splashes. The coverall protects against light sprays of liquid chemicals to a limited extent. Coverall Comfort combines functionality and comfort by wearing elastic in the hood, ankles and waist, so the coverall wraps tightly around your body. The coverall also features a zipper with storm flap and taped seams for extra protection. You will also enjoy great mobility in this model, which comes with elastic at your wrists and straps for your thumbs, ensuring that the sleeves stay in place. All of these details make OX-ON Protect Coverall Comfort a high-quality coverall that you will enjoy in your work.
